# Western Entrance Technology

Western Entrance Technology (WET) was formed in 1999 to bridge the gap between the traditional architectural door and hardware industry and the rapidly emerging security access market. Western Entrance specializes in integrating mechanical hardware with low voltage electrical systems.

The accessibility compliance requirements of the Americans with Disabilities Act (ADA) and the desire for advanced security in many businesses have increased the demand for specialized openings. WET specifically designs each entrance for our customers whether it is one door or 500 doors. Western Entrance Technology works with existing openings or new applications and has the technical expertise and knowledge to get the job done correctly the first time.

**The staff of Western Entrance Technology** has over 45 years of experience working in a range of professions. This includes careers as Locksmiths, Distributors, Manufacturer Representatives and Project Managers and we have an Architectural Hardware Consultant and a System Integration expert on board. This background allows us to work seamlessly with Manufacturers, Distributors, Owners, Contractors and Architects to produce positive results.

#### **Partner Manufactures;**

**DSX** offers symmetrical scalability. One Door to Enterprise Wide Solutions. Grow your system from one location and one PC to 32,000 locations and up to 99 PCs on a Wide Area Network.

**Record** ~ Manual doors can be difficult to move or open for the physically challenged and the elderly. Record Systems, Inc. is aware of the special situations and challenges that doors can represent to those among us that need assistance to enter or exit freely. Simply stated, doors are barriers and door automation allows us to control those barriers.

**Architectural Control Systems, Inc.** (ACSI) designs and manufactures a complete line of quality electrified hardware products which meet the diverse needs of the architectural and security hardware industry.

#### **Licenses and Certifications;**
